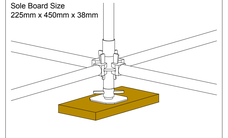
Spreader Detail
Min. 1 Level to be installed

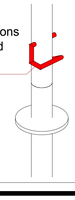
Sole Board Size
225mm x 450mm x 38mm



Locked Standards

All Standard connections to be secured / locked

LAYHER Locking Pin



SCAFFOLD INSTALLATION

STRUCTURE TO BE ERECTED IN A SAFE MANNER IN COMPLIANCE WITH LAYHER ALLROUND ERECTION MANUAL AND TO BS EN 12811.

ASSEMBLY, ALTERATION AND DISMANTLING OF THE OVERALL STRUCTURE INVOLVES RISK OF FALLS. PERFORM CONSTRUCTION WORK IN SUCH A WAY THAT THE RISK OF FALLS IS AVOIDED AS FAR AS POSSIBLE AND THE RESIDUAL RISK IS MINIMIZED IN ACCORDANCE WITH NATIONALLY RECOGNIZED STANDARD SG4:10 AND WORKING AT HEIGHT REGULATIONS 2005. FALL PREVENTION METHODS RELATING TO THE LAYHER SYSTEM MAY BE REFERRED TO THE LAYHER ALLROUND SCAFFOLDING INSTRUCTIONS FOR ASSEMBLY AND USE.

MATERIALS AND MODIFICATION

ALL EQUIPMENT NOT SUPPLIED BY ACTAVO EVENTS IS THE RESPONSIBILITY OF THE CLIENT.

NO SHEETING OR NETTING SHOULD BE ATTACHED TO THE SCAFFOLD WITHOUT NOTIFY ACTAVO EVENTS, UNLESS ALREADY INDICATED.

THIS DRAWING HAS BEEN PREPARED USING SAFE WORKING LOADS OF DIFFERENT MANUFACTURERS TECHNICAL MANUALS SPECIFIED. NO ALTERATION TO COMPONENTS, ASSEMBLY, LOADING OR ANY OTHER ASPECT MUST BE MADE WITHOUT WRITTEN AUTHORITY FROM ACTAVO EVENTS.

REVISION

IMPOSED LOADS

SCAFFOLD DESIGNED TO :

1 LEVEL @ 5.00 kN/m²

☑ OUTDOORS ☐ INDOORS

(if outdoors the wind load will be considered to BS-EN-1991-1-4 if not otherwise stated)

GENERAL DRW INFORMATION

This drawing is copyright of Actavo Events and shall not be reproduced without prior written permission. All supplied components shall be used strictly in accordance with this drawing and Layhers technical information. Actavo Events supplied material should not be modified or used with other suppliers equipment without consulting the design department of Actavo Events.
The Client is subject to charges for excessive cleaning or damage to equipment. Fair wear only accepted.
Our designs are based on information supplied by our clients. The purpose of our design service is to ensure the correct erection of our Layher equipment. Whilst our designs represent as complete a temporary works solution as possible there may be elements requiring on site solutions. These elements are noted.
Our designs are submitted for Client approval to ensure that we have correctly interpreted their requirements. Our drawings, calculations and Layher product information should be read in conjunction with the contractors own on-site working and assembly instructions including any onsite safety file (Any conflict of interest must be referred back to Actavo Events before any action is taken). It is the contractors responsibility to verify that our equipment is used in compliance with our designs. This will enable the contractor to 'sign off' relevant certificates/permits if required.
Actavo Events accepts no responsibility for the performance or capability of the permanent structure. It is the responsibility of the contractor to ensure the permanent structure is capable of safely transmitting all temporary works loads from our equipment. However the behaviour of the permanent structure resulting from these loads may at times require separate structural analysis. This is a matter for a structural engineer and it is the responsibility of the contractor to engage an expert as we do not provide these services.
